

This is the phone system you've been waiting for...

Finally, Receive Calls Anywhere in the World -from China to Canada - on the Same Phone Number, While Reducing Your Telecom Costs!

Dear [Executive]

Busy executives like you have two major challenges – getting things done, and keeping costs down in the process. That's why you'll want to know about a new service that is newly available to you through [company name].

The telecom field is continuing to serve you in new and vital ways - long distance prices continue to drop, and technology advances continue which bring simplicity and ease of communications to your daily routine, and we are introducing a new phone system brings you the best of both worlds.

When you are on the go, especially travelling between countries, you don't want to be held hostage by lack of communications. You need to be able to be reached, and to reach out and make calls anywhere, anytime, and without being price gouged in the process.

We are very pleased to announce the Global PABX - an amazing phone system that combines the best "voice over IP" (VOIP) with global availability with extremely low costs. This system enables you to answer your business calls anywhere in the world – without costly toll charges. People can reach you anywhere you are in the world by calling the same phone number! You can answer the calls on your mobile phone, on your laptop, in your hotel, in a remote office - literally anywhere!

- Receive calls anywhere in the world to the same phone number for maximum convenience
- Ultra competitive international toll charges to greatly reduce your phone bill
- Nearly every conceivable feature of a traditional PBX without the costly investment

Even if you move your offices, you just plug your handsets into the Internet and you are up and running! Here's what one of our customers has to say about his experience with this system:

"We have been extremely impressed by the Ittelenet PABX service. It's brilliant being able to unplug my phone from our Las Vegas office, fly to China, plug the phone in there and have all my calls immediately reach me. We have greater flexibility, decreased costs and increased revenues." - Steven Turner, CEO, WASINC International

We are New Zealand's leading mobile handset distributor. Our customers have been expressing their need for greater flexibility in their office phone systems as well, so we had been searching for a system that would bring the flexibility and portability of mobile phones to a corporate environment. Once we tried this leading-edge system ourselves, we knew that the Global PAX system was the product we wanted to stand behind.

There is almost nothing you can't do with this phone system in terms of portability, using it anywhere in the world, without requiring a complicated hardware upgrade. And of course, maximum flexibility means not being locked into any long term contracts. However, once you see the reduction in your monthly phone charges, you won't want to use anything else.

*Note: You'll save so much money, you may be able to reallocate what you were spending on toll charges to bring on new staff to help grow your business.

One of the features that is absolutely vital to you is *consistent call quality*, and you get it with this system, even in "extreme" mobile situations, such as using mobile phones over Wi-Fi! That's right, with this system you can use your mobile phone to place nearly free calls from anywhere on the globe that there is a Wi-Fi hotspot, without a loss of call quality. Talk about ultra flexibility! The Global PABX works on every continent of the globe, and all it requires is the Global PABX to be plugged in at your main office location.

We are excited to stand behind this system. We are known by our customers as providing incredible customer service. In the unlikely event that you have any problems or questions, we are here to serve you 24/7. We take care of everything for you, and offer an incredible line of telephony products that can enhance and upgrade your system to meet nearly any modern demand.

For a very limited time we are offering the Global PAX – the Ultimate Global Office System for new customers - *with no setup fees!* And to make it even easier for you to try out this system, we are offering you the ultra modern mobile phone that won Wired Magazine's "Best of the Test" - the *Nokia E71 Business Smartphone* – dubbed "*the Blackberry Killer*" for just \$799, normally \$949.

You may get up to 10 handsets at this price while quantities last. *But you must act quickly because this mobile phone and this offer are for a limited time.* This is an introductory offer that may be revoked.

Call xxx-xxx-xxx today to learn how this system can enhance your productivity, and we will review your long distance bill and show you exactly how much money you will save every month. You'll be amazed at both the savings and the convenience, so call today!

Sincerely,
